

IT-30™

Partswasher-Reclamation System

PRODUCT DESCRIPTION

The Inland Technology **IT-30™** Partswasher Cleaning System is designed for high-volume usage. This system provides a motor pool partswasher that has a handier size requiring less solvent for operations and making acquisition more cost effective. This machine has a lifetime warranty as long as Inland Technology filters and solvents are used in the machine.

The **IT-30™** is equipped with the Inland Technology **EDGE TEK™ Micro Filtration System**, a unique element which filters down to .1-micron nominal. When properly managed and used with one of Inland Technology's family of Green, Environmentally Compliant Solvents, **BREAKTHROUGH®** and **SKYSOL® 100**, this system usually extends solvent life for several years. Documented hazardous waste reduction averages 80% per installation for this waste stream.

The **IT-30™** has been designed as a remote reservoir partswasher. It meets or exceeds most air-quality requirements for remote reservoir solvent cleaning.

Specifications

Sill/Working Height:	38"
Inside Tub Dimensions:	32" L x 20" W x 8" H
Electrical Requirements:	120V, 60Hz, 3.2A
Pump Systems:	500 GPH Pump
Tube Thickness:	14 Gauge Steel
Drain Basket:	200 micron 3 1/4" Diameter with steel crumb cup
Solvent Capacity Min.:	25 Gallons
